

India — Tehsil Directory

36 states and union territories · 782 districts · 7092 tehsils · 677,364 villages

Every figure on these pages is counted, not transcribed: village totals were derived from the directory's own village file, and the sum across this table equals the directory's published total exactly. A tehsil showing zero villages is a fully urban tehsil with no revenue villages in it — that is the record, not a gap. Headquarters is filled only where the directory records one.
